

**CAUTION: HEAVIER THAN NORMAL TRAFFIC EXPECTED AROUND  
ED RADICE PARK**

**Construction at the Northwest Regional Water Reclamation Facility may cause increased truck traffic in and around Ed Radice Park now through Winter 2019**

You may have noticed increased traffic in and around Ed Radice Park lately. This is due to construction work to expand the Northwest Regional Water Reclamation Facility, which is located directly behind the park. The main entrance to the facility is located at the end of Ed Radice Dr., and is accessed via the main park entrance.

Construction crews will be leaving the site weekdays between 3:30 and 6:30 p.m. On Saturdays, crews will work from 7:00 a.m. to 4:00 p.m. No construction will take place on Sundays.

Your safety remains our top priority, so please be cautious as you travel in and around Ed Radice Park and its surrounding roads. And please encourage your children to pay extra attention when crossing the streets and walking to and from the parking lots in the park.

Information about the project is available online at [HCFLGov.net/WWC](http://HCFLGov.net/WWC). Questions about the project may be directed to Citizen Engagement at (813) 272-5275. Para información, llame al (813) 272-5275. For hearing and speech impaired assistance, call 711.

Thank you for your patience during important project to improve wastewater service in Northwest Hillsborough County.
