

Design Certification For Exterior Lighting

Prior to the issuance of a Certificate of Occupancy for new development or approval of the final permit release for renovation or expansion of an existing development, a licensed professional engineer shall provide certification stating that the exterior lighting as installed complies with the provision of this Part. Existing developments proposing to upgrade, change or replace 50 percent or more of any component, said certification shall be provided prior to final electrical inspection.

Certification Statement

I certify the design and installation complies with the provisions of Section 6.10.00 of the Hillsborough County Land Development Code.
